Stand colour:	Silver, anthracite, blue, white
Stand colour code:	RAL 9006, 7021, 5013, 9016
Seat material:	HPL
Stand material:	Steel

Care instructions

LAMINATE

GENERAL

Laminate is a durable material, but is sensitive to water infiltration around the corners. Use thick, protective mats for flower pots, plates, coffee cups, etc. where there is a risk of spillage. Remove all stains and fluids as soon as possible and wipe the surface dry afterwards. Be careful when using warm, hard or sharp objects as they can damage the surface.

CARE

Clean the surface with a soap-based cleaning agent diluted in water, then wipe the surface dry with a soft, dry cloth.

STAINS

Stains can be removed using a mild cleaning agent and a soft cloth. For more difficult stains, you can carefully apply acetone, but not on the edges. Do not use scouring powder, steel wool or other abrasive products. Wipe the surface dry after cleaning.

LACQUERED METAL

GENERAL

Lacquered metal is a durable material, but can be sensitive to oxidation that then lets scratches occur. Scratches to the lacquer should be lacquered to prevent rust. Be careful when using warm, hard or sharp objects as they can damage the surface.

CARE

Clean the surface with a soap-based cleaning agent diluted in water, then wipe the surface dry with a soft, dry cloth.

STAINS

Stains should be removed using a mild cleaning agent and a soft cloth. For more difficult stains, you can carefully apply methylated spirits. Do not use scouring powder, steel wool or other abrasive products. Wipe the surface dry after cleaning.
